

## i-scrub<sup>™</sup> 26H

---

A revolutionary  
light in the dark

# Advanced soft edge technology

---

The microfiber hand range cleaner with integrated LED or black light will make sure the job gets done. Complete with patented soft-edge technology which allows the user to clean round areas. Need to reach high-up places? Just switch the handle for a telescopic tube, and you are good to go! You are 50% faster than with a regular microfiber cloth and more ergonomic handling for your operator.

### Rubber grip

A handy rubber grip will make your task a lot easier, and will not scratch, damage or cramp your most important instrument: your hands. Red, green and yellow grip available!

## Key features

### Integrated black or LED light

Make everything spotless in your washrooms by pre-examining your work with the choice between an integrated black or LED light inside of the handle. Make the unvisible visible.

### Microfibre pads

Premium pads with mesh backing with Trio split technology. Solid color exclusive microfiber material. Used for low to heavy soil levels and all other applications.

i-scrub 26h LED light

### Soft edge technology

Patented soft edge technology which allows the microfibre pads to clean round areas such as sinks and other curved materials.
